Academic Qualifications

2023–Present: BS Software Engineering

2021–2023: Intermediate

2018–2021: O' Levels

SSUET, CGPA: 3.66 (7th Semester)

Apwa govt. College

Falconhouse Grammar School

Work/Internship Experience

LA Consulting (SMC-Private) Limited · AI Engineer and Full-Stack Intern · Internship (September 2025 – April 2026) – Remote

- Developed AI-powered features for a full-stack freelancing marketplace using React Native (Expo), TypeScript, JavaScript, Supabase, and PostgreSQL, building scalable frontend and backend modules with REST APIs, database operations, authentication, and responsive mobile interfaces.
- Implemented wallet management, escrow payments, milestone tracking, dispute resolution, Stripe integration, Firebase Cloud Messaging (FCM) for push notifications, and Socket.IO for real-time messaging and communication.
- Applied Object-Oriented Programming (OOP), clean coding practices, debugging, testing, and performance optimization to deliver scalable, production-ready features.
- Collaborated in an Agile/Scrum environment using Git/GitHub, participating in sprint planning, code reviews, and cross-functional software development.

Projects

Colorize (AI-Based): Developed an AI-powered skin tone analysis system, leveraging computer vision, image processing, Haar Cascade face detection, RGB/Hex color analysis, CSV processing, file upload handling, and a rule-based recommendation engine (*Python, Flask, OpenCV, Pandas, NumPy, HTML, CSS, and Jinja2 and Object-Oriented Programming- OOP*)

Angry Bird 3D Game: Created a 3D game simulating Angry Bird mechanics using Pygame and PyOpenGL. Implemented physics-based motion and collision detection (*Python, Pygame, OpenGL*)

Dungeon Crawler Game: Developed a 2D Dungeon Crawler game with player movement, combat mechanics, character stats, and leveling systems using object-oriented programming concepts (*Java, Data Structures & Algorithms (DSA), Java Swing/AWT*)

Cab Booking System, Recipe Manager System & Banking Simulator: Developed Java-based desktop applications using Java Swing, GUI components, file handling, and modular architecture, building cab booking, recipe management, and banking systems with authentication, data management, trip operations, and transaction processing, applying OOP, software design principles, and design patterns (*Java Projects*)

BankEase (Smart Banking System): Developed an accessible Python-based smart banking system for dyslexic users (*Tkinter GUI, FIFO, SJF, and Priority Scheduling algorithms*)

Skills

- **Programming Languages:** Java, Python, JavaScript, TypeScript, HTML, CSS
- **Frameworks & Libraries:** React Native (Expo), Tkinter, Java Swing, Pygame, PyOpenGL
- **Backend & Databases:** PostgreSQL, Supabase, Firebase, REST APIs
- **Tools & Platforms:** Git, GitHub, Socket.IO, Stripe, VS Code
